

RAJARIKAM LOKESH KUMAR

DevOps Engineer | CI/CD Automation | AWS | Kubernetes | Terraform

 rajarikamloreshkumar@gmail.com  9640291753  Hyderabad

 [linkedin.com/in/rajarikamloreshkumar-369206249](https://www.linkedin.com/in/rajarikamloreshkumar-369206249)

SUMMARY

DevOps Engineer with 3+ years of experience in CI/CD automation, AWS cloud infrastructure, Kubernetes orchestration, and DevSecOps best practices. Skilled in GitOps-based continuous delivery using Argo CD and Helm, Infrastructure as Code with Terraform, and integrating security scanning into the software delivery lifecycle. Experienced in designing resilient Jenkins pipelines, automating cloud provisioning, and implementing observability with Prometheus, Grafana, and CloudWatch. Strong background in production support, incident management, and root cause analysis within high-availability Linux environments, with working knowledge of Bash and Python scripting.

TECHINICAL SKILLS

DevOps Tools: Jenkins, Git, GitHub, Bitbucket

Cloud Platform: AWS – (EC2, S3, VPC, IAM, ELB, ASG, SNS, EKS)

Containerization & Orchestration: Docker, Kubernetes, Helm, Argo CD (GitOps)

Infrastructure as Code: Terraform

Monitoring & Logging: Prometheus, Grafana, AWS CloudWatch

Build Tools: Maven

Web Server / Proxy: Nginx

Artifact Repository: JFrog Artifactory, Nexus Repository

Security Tools: SonarQube, Trivy

Scripting: Bash, Python

Database: AWS RDS (MySQL, Postgres)

Operating Systems: Linux

PROFESSIONAL EXPERIENCE

PruTech Solutions

06/2023 – Present | Hyderabad

DevOps Engineer

- Architected and maintained end-to-end **Jenkins CI/CD pipelines** automating build, testing, security scanning, Docker image creation, and deployment, improving release efficiency.
- Implemented **GitOps**-based continuous delivery using **Argo CD**, enabling automated application synchronization, rollbacks, and Kubernetes deployments across environments.
- Packaged and deployed containerized applications using **Helm** charts, standardizing Kubernetes deployments and enabling repeatable application releases.
- Provisioned and managed **AWS** cloud infrastructure including EC2, VPC, IAM, S3, ELB, Auto Scaling Groups, and EKS using **Terraform** for automated infrastructure deployment.
- Built and maintained **Docker** images and deployed containerized applications to **Kubernetes (EKS)** clusters across development, staging, and production environments.
- Administered Kubernetes resources including Deployments, Pods, Services, Ingress, ConfigMaps, and Secrets to ensure application availability and scalability.

- Executed Rolling, **Blue-Green**, and **Canary** deployment strategies to enable zero-downtime releases.
- Configured monitoring dashboards and alerts using **Prometheus**, **Grafana**, and **CloudWatch** to improve system observability.
- Integrated **SonarQube** and **Trivy** into Jenkins pipelines to implement **DevSecOps** practices and automate security scanning.
- Managed build artifacts and dependency versioning using JFrog Artifactory and Nexus Repository within CI/CD workflows.
- Performed production support, incident management, and **root cause analysis** to maintain system reliability.
- Monitored Linux production environments, analyzed logs, and resolved application and infrastructure issues.
- Collaborated with development, QA, and operations teams in **Agile/Scrum** environments to deliver secure and scalable cloud-native applications.

INTERNSHIP EXPERIENCE

TEKhops IT Solutions

01/2023 – 05/2023 | Hyderabad

.NET Developer Intern

- Assisted in developing backend components using **ASP.NET MVC and Web API**.
- Participated in migrating legacy applications from **.NET Framework to .NET Core**.
- Performed **bug fixing, testing, and performance improvements** for backend services.
- Contributed to **code reviews and development best practices**.

DEVOPS EXPERTISE

- CI/CD Pipeline Design & Automation
- GitOps Continuous Delivery (Argo CD & Helm)
- Containerized Application Deployment (Docker & Kubernetes)
- Infrastructure as Code (Terraform)
- DevSecOps & Container Security
- Monitoring & Observability
- Production Support & Incident Management

EDUCATION

Bachelor of Information Technology

08/2019 – 04/2023 | Hyderabad

Malla Reddy College of Engineering & Technology

PROFESSIONAL STRENGTHS

- Strong troubleshooting and production support skills
- Experience working in Agile/Scrum development environments
- Effective collaboration with development, QA, and operations teams
- Quick learner with strong adaptability to new technologies and tools
- Ability to work in fast-paced environments with multiple concurrent projects
